FEATURES

HEALTH RECOMMENDATIONS ENGINE

View science-backed recommendations tailored to DNA, lab results, and lifestyle, clearly linked to supported health areas or conditions and searchable by type, like diet or supplements.

LAB ANALYZER & TRACKER

Analyze and track 4,000+ lab markers with genetic context and personalized insights. Upload results using OCR, view trends over time, and receive tailored health recommendations based on lab data. Get smart suggestions on lab tests to do next driven by the health profile.

PERSONALIZED HEALTH ACTION PLANS

Instantly generate tailored health plans & regimens using DNA, lab tests, and lifestyle risks. Add custom notes auto-applied across clients.

MEAL PLANNER

Create personalized meal plans based on DNA, lab results, and food sensitivities, including macronutrient targets, nutrient recommendations, recipes, and shopping lists.

THE 1ST PRECISION HEALTH GPT

Use any language to interact with an AI-empowered precision health chat bot and get answers specific to personal health data (genetics, blood tests, questionnaires) and DNA-based recommendations for nutrition, supplements, and lifestyle tailored to the unique health profile.

All features are included with any of the SelfDecode bundles.

GENE LOOKUP TOOL

Quickly look up genotypes across 20,000 genes, search and bookmark key genes, and build custom collections for deep, case-specific analysis.

SNP LOOKUP TOOL

Quickly look up genotypes across 200M+ variants, search and bookmark SNPs, and create downloadable PDFs of custom SNP collections for detailed, case-specific analysis.

LIFESTYLE RISK ANALYZER

Access 150+ scientific lifestyle assessments to provide with risk scores based on activity, environment, diet, medical history and more. Get actionable recommendations to reduce the risk.

PREDICTIVE HEALTH MONITORING

Get an overall health score based on your DNA, environmental and lab test data. As you adopt healthier habits, your score improves motivating you to keep making positive lifestyle changes.

PERSONALIZED GENETIC BLOGS

Choose from 600 expertly written articles on key health topics and conditions, each referencing your unique genotype and personalized health impacts.
